## Water Quality Information Center (WQIC)

provides electronic access to information on water quality and agriculture. The center collects, organizes, and communicates the scientific findings, educational methodologies, and public policy issues related to water quality and agriculture.

## Spotlights

### Electronic Publications Database

The center's database of online documents covering water and agriculture. You can now access more than 1,800 documents.

### Dynamic Bibliographies

Real-time searches in the NAL catalog (AGRICOLA) for up-to-date, librarian-built queries.

### CEAP Bibliographies

A four-volume bibliography, offering more than 2,700 citations, in support of the Conservation Effects Assessment Project (CEAP) which is studying the environmental effects of conservation practices implemented through various USDA conservation programs.

### Wetlands

A resource guide covering various aspects of wetlands, including aquatic plants, constructed wetlands, riparian areas, hydric soils, and pollution control.
